Get a Free AI-readiness Diagnostic

Know Where You Stand Before You Scale!

SMBs want AI. But only a few are truly ready for it.

AI is no longer a futuristic dream, it's a real-time advantage. But there's a catch: enthusiasm doesn't equal readiness. Many small and mid-sized businesses are diving into AI pilots without the foundational data strategy, integrations, or governance in place.

The result? Expensive misfires, stalled projects, and missed opportunities.

We've seen repeatedly organizations with the ambition to innovate, but without the clarity to make it sustainable. That's why we created the AI-Readiness Diagnostic, a zero-risk assessment to help you evaluate your AI potential before investing.

Why Most SMBs Aren't Leveraging AI

Despite the buzz, the road to AI success isn't paved with hype, it's built on clean, connected data and smart strategy.
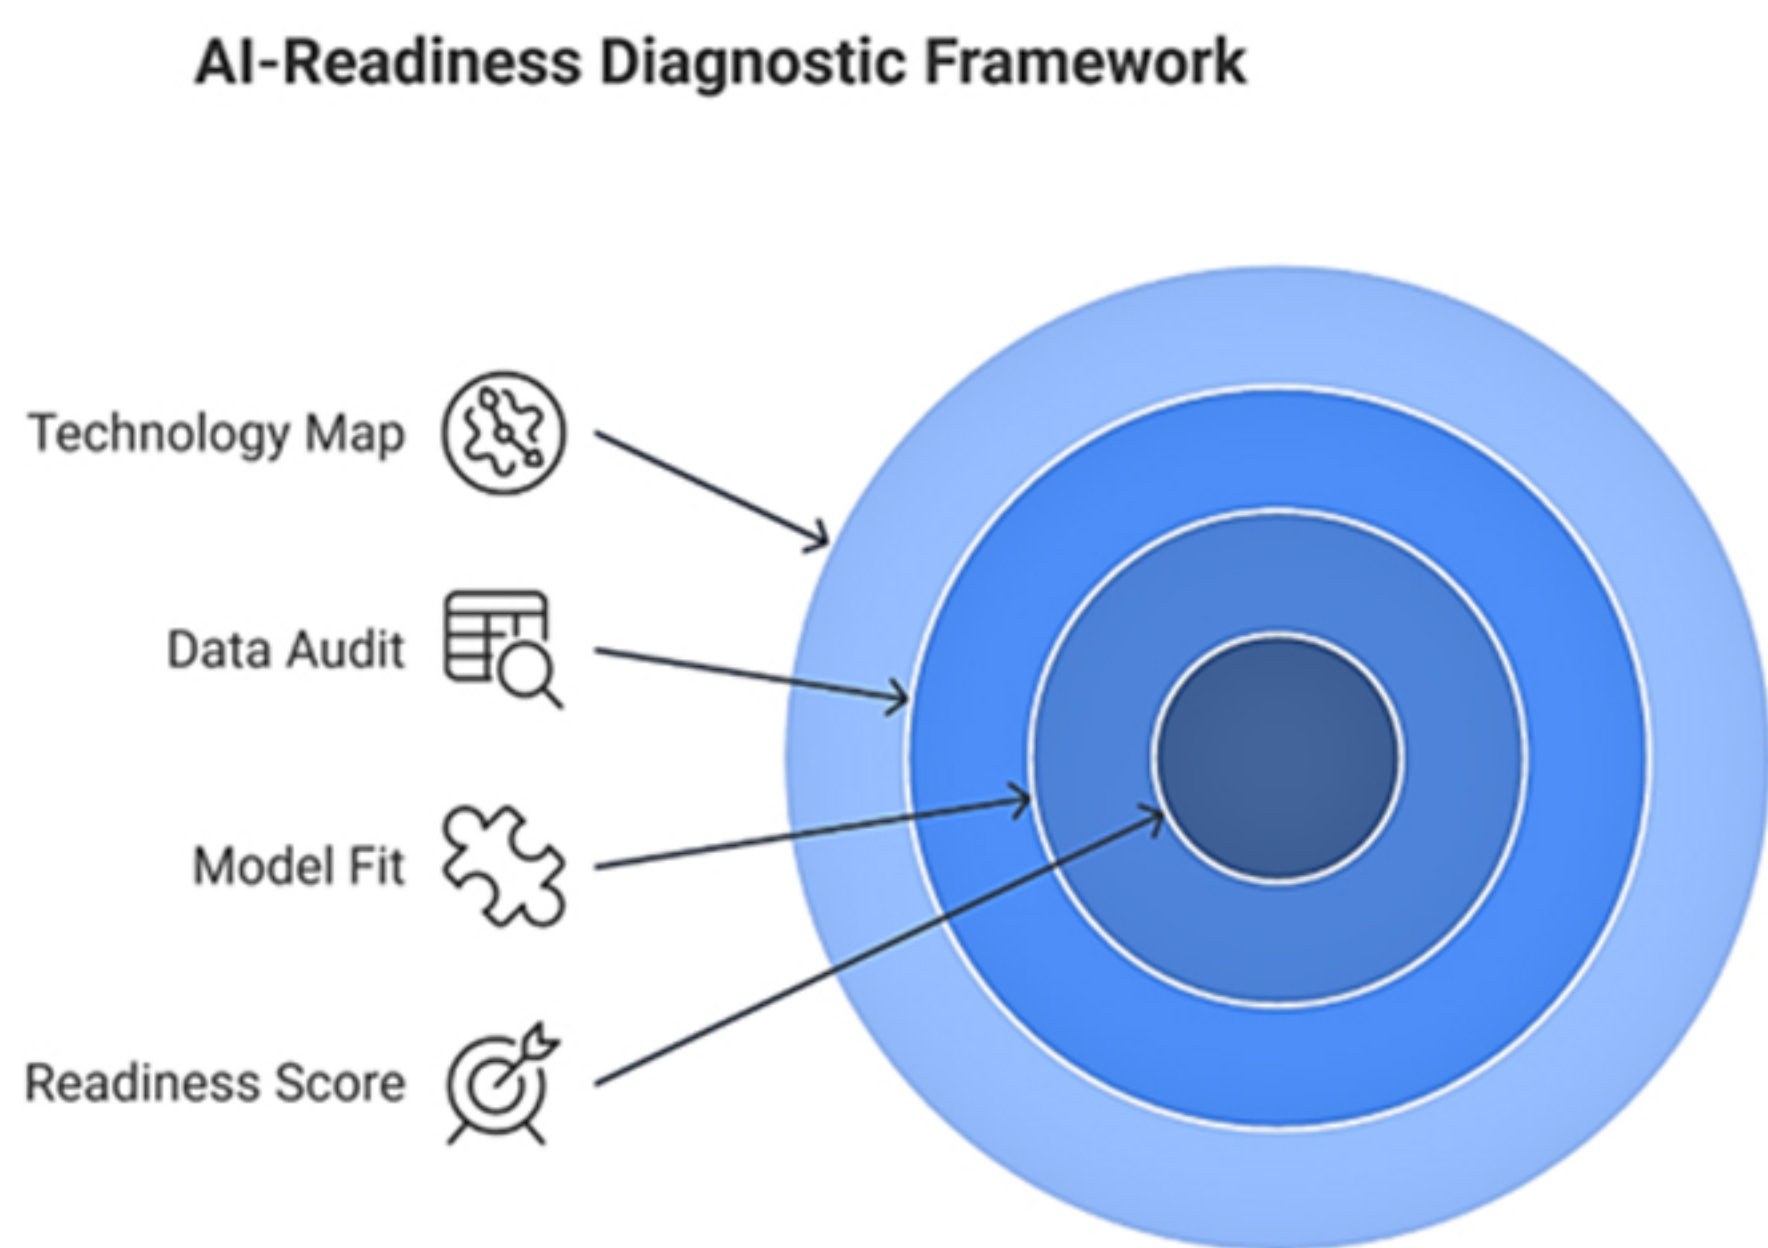

Unfortunately, many SMBs hit the same roadblocks:

» Messy, fragmented data that makes AI results unreliable

» Lack of internal governance, no clear rules for how data is collected or used

» Unclear ROI due to vague goals and AI misconceptions

» Budget constraints and a shortage of AI talent in-house.

Scenario

A retail SMB gathers massive customer data through web and POS systems. But without a unified view or analytics layer, they can't identify churn risks or personalize outreach. The data exists but the insights don't.

What's Inside Our AI-Readiness Diagnostic

Our diagnostic cuts through the complexity to deliver clear insights tailored to your business. Here's what we assess:

» **Data Audit :** How structured, clean, and complete is your current data landscape?

» **Model Fit :** What AI use cases are viable given your data and goals?

» **Readiness Score :** A simple benchmark showing how prepared you are today

» **Technology Map :** A practical look at platforms and tools that can support your journey

The result? A full picture of where you stand and where to go before you commit a single dollar to AI development.

What to Expect from the Diagnostic

You'll walk away with more than a score, with a clear plan!

Deliverables include:

» A concise summary of findings

» A 30-minute readout session with HexaCorp AI experts

» A 3-stage roadmap - Clean › Connect › Create

» Action items ranked by effort and impact

» AI use case recommendations customized to your industry.

Success Snapshot

A mid-sized manufacturer completed our AI-Readiness Diagnostic. It uncovered fragmented data between production and inventory systems.

After resolving those silos:

» They enabled predictive maintenance using AI models

» Cut unplanned downtime by 25%

» Gained internal buy-in for further AI investment through a successful pilot.

Why HexaCorp?

We specialize in making AI practical for SMBs.

» Hands-on experience across industries like healthcare, finance, energy, and manufacturing

» End-to-end services, from data preparation to AI deployment

» Leveraging tools like Microsoft Power Platform, Azure OpenAI, Dataverse, and more

» Global support model with delivery centers in NJ and India, offering speed and flexibility.
