# Is Your Data Scattered Across Silos?

Unlock Speed, Insight, and Efficiency with Unified Data Intelligence

Nearly 70% of businesses struggle to make timely decisions due to data trapped in silos.

Departments operate in isolation. CRMs, billing tools, analytics dashboards, and legacy platforms often don't talk to each other.

The result? Disjointed operations, conflicting reports, and missed opportunities.

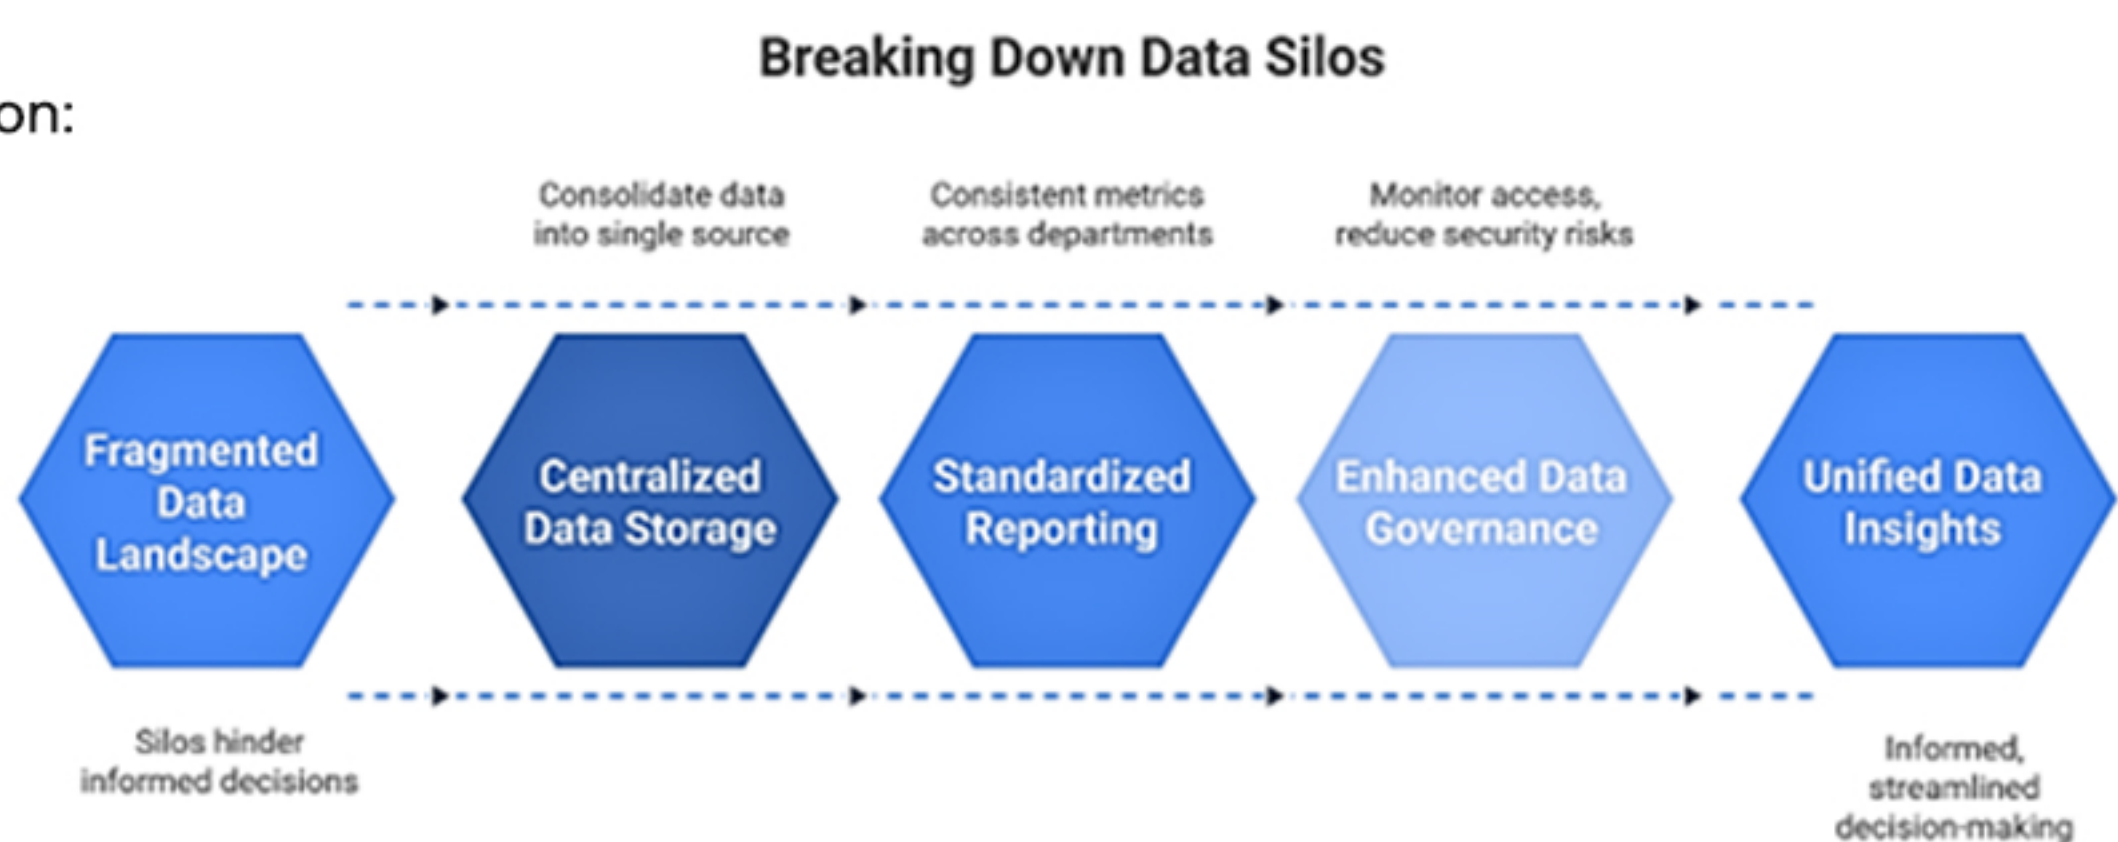

Data silos are more than a technical glitch, they're a strategic risk. They arise when systems, teams, or tools are disconnected, making it difficult or impossible to share insights and collaborate efficiently.

But there's a better way. Unified Data Intelligence & Automation from HexaCorp can help you connect the dots, streamlining decision-making and driving measurable results.

## The Hidden Cost of Data Silos

While data silos often go unnoticed, their impact is felt across your organization:

- » Delayed decision-making due to fragmented insights
- » Duplicated work from disconnected departments
- » Inconsistent reporting and conflicting KPIs
- » Security risks from shadow IT and unmonitored access.

## Scenario

A marketing team uses HubSpot, while the sales team runs Salesforce. The customer journey is fragmented, resulting in lost leads, disjointed messaging, and poor pipeline visibility.

## What Unified Data Looks Like

Unified data is more than system integration, it's about building a single, trusted version of truth, accessible in real time across the organization.

## Benefits of unified data include

- » Reliable, real-time reporting
- » Enhanced customer experiences driven by connected insights
- » Faster time-to-insight for strategic agility
- » Simplified governance and easier compliance.

## Tools that support this transformation

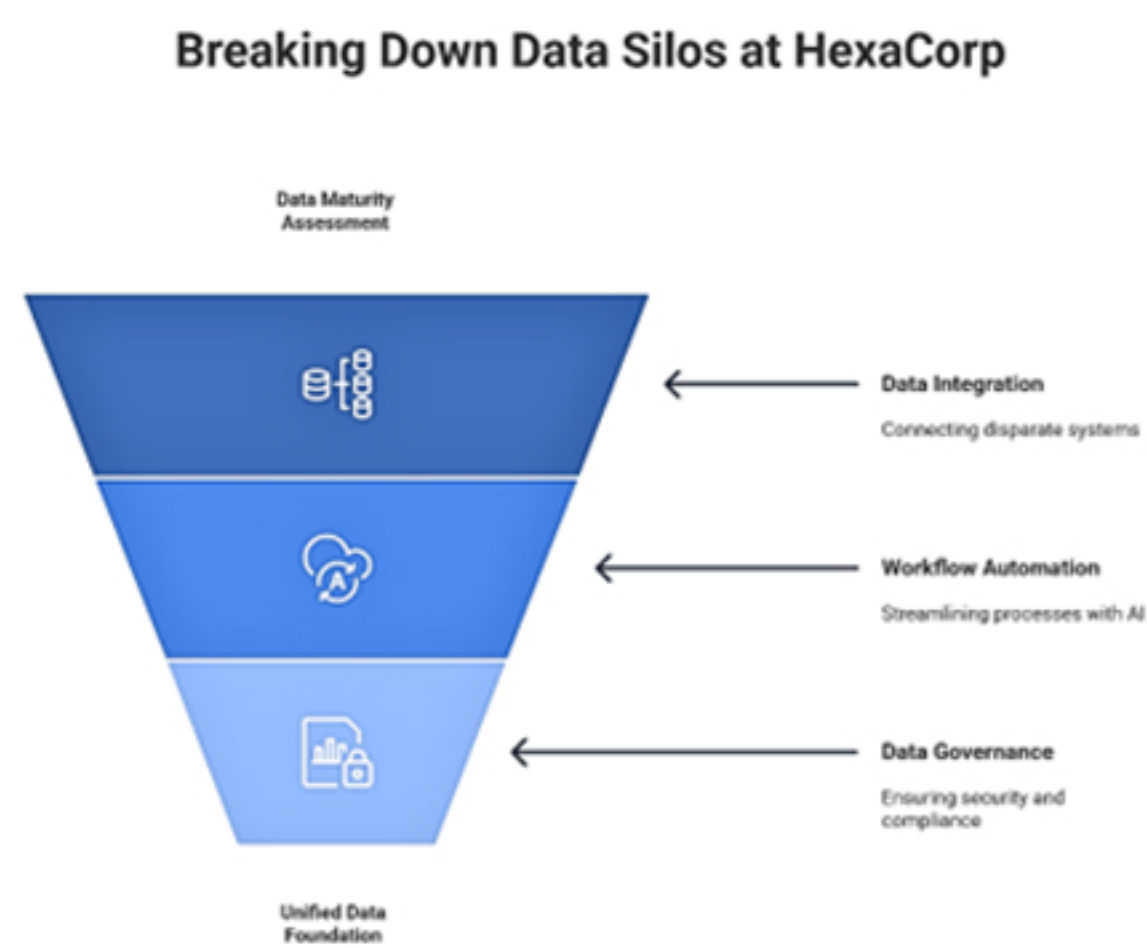

- » Microsoft Power Platform
- » Azure Synapse Analytics
- » Microsoft Dataverse
- » Power BI

These platforms help automate, govern, and visualize data placing insights in the hands of decision-makers, not just data teams.

## How HexaCorp Solves the Silo Problem

At HexaCorp, we take a structured and industry-aware approach to break down silos:

- » **Assess** : Conduct a detailed data maturity assessment
- » **Integrate** : Use APIs and native connectors to sync disparate systems
- » **Automate** : Deploy Power Automate, AI models, and RPA for streamlined workflows
- » **Govern** : Build a secure, compliant, and scalable data foundation.

## What sets us apart

- » **Industry-specific blueprints** - Healthcare, Manufacturing, BFSI, Energy, and Retail.
- » **Flexible deployment options** - On-prem, hybrid, or multi-cloud
- » **Global delivery model** with a presence in NJ, USA, and India for faster turnarounds.

## Success Snapshot

**Challenge** : Patient data was scattered across EMR, billing, and scheduling platforms.

**Solution** : HexaCorp unified the systems, implemented governance policies, and built an insights dashboard.

### Results

**30%** reduction in claims processing time      **50%** boost in patient engagement and satisfaction      Automated compliance with HIPAA regulations

This transformation unlocked faster workflows, better care coordination, and stronger regulatory alignment.

## Ready to Break Down Silos?

Your data silos are costing you more than you realize!

Disconnected systems lead to delays, frustration, and inefficiencies. With HexaCorp's Unified Data Intelligence approach, you can transform fragmented operations into insight-driven performance.
